NOTICE OF WORKSHOP

FOR DISCUSSION OF 2013 AIR TOXICS "HOT SPOTS" PROGRAM REPORT

The San Diego County Air Pollution Control District (District) will hold a public meeting to receive comments on the 2013 Air Toxic "Hot Spots" Program Report. Comments regarding the report may be submitted at the workshop, or in writing prior to the workshop, which is scheduled as follows:

DATE: Monday, July 21, 2014
TIME: 9:00 a.m. – 11:00 am
PLACE: San Diego Air Pollution Control District
Main Conference Room
10124 Old Grove Road
San Diego, CA 92131

The District has prepared a 2013 report of the local program implementing the Air Toxics "Hot Spots" Information and Assessment Act of 1987 (AB2588). The Air Toxics "Hot Spots" program requires facilities that emit toxic substances to provide local air pollution control districts with information that will allow an assessment of the air toxics problem, identification of air toxics emission sources, notification of the public exposed to significant health risk from toxics air emissions, and development of effective strategies to reduce potential risks to the public.

The report summarizes the "Hot Spots" program elements, the current status of the program in San Diego County, stationary and mobile emission estimates, emission reduction efforts, results of local health risk assessments and current status of public notifications and risk reduction plans. Stationary source emission estimates, by facility, are available on the District's website at http://www.sdapcd.org/toxics/fac_emissions/facilities.html.

A summary of comments received will be prepared and provided to the Air Pollution Control District Board as part of its consideration of the 2013 report at a public hearing. The draft report is available at http://www.sdapcd.org/homepage/public_part/workshops/public_workshops.pdf. If you have any questions or comments concerning the draft report, the Air Toxics "Hot Spots" program, or the upcoming workshop, please contact Archi dela Cruz at (858) 586-2732.

THOMAS R. WEEKS, Chief, Engineering Division
Air Pollution Control District
